It's Cookie Time!

Silver Maple Veterinary Clinic

Your Community Veterinary Clinic

Plus, we have some new products to tell you about.....

First, the cookie news! One of our major fundraising events for the Mooch Memorial Fund is the Uncle Ralph's Cookie Sale.

This sale will begin on October 19th and end on November 25th. The cookies will be delivered to Silver Maple on

December 10th....just in time for Christmas! So, stop in a place and order (or two)...buy some for your friends and family and, most important, know that you are helping to support the Mooch Memorial Fund!

Ectopamine is the new natural flea and tick spray we have available in our clinic. Manufactured by Meridian Animal Health and on the market since 2008, this natural product kills and repels fleas, ticks and mosquitoes with natural ingredients. It is safe for use around children and pets and is veterinarian tested. Studies show the Ectopamine Natural Flea, Tick and Mosquito Topical works for two to four weeks. However, if the area is highly infested, the topical will need to be applied more often and it is safe to do so, when used as directed. For more information, ask a staff member or visit:

<http://www.meridiananimalhealth.com/faq.asp>

Flea and tick prevention is important because:

- *Your pet can contract illnesses such as: flea allergy dermatitis, tapeworm infestation and Lyme disease.*
- *Fleas and ticks enter your home on your pets, causing all sorts of problems.*
- *Fleas and ticks don't necessarily go away in winter...especially in south-eastern PA.*

Profender—a topical solution for deworming

Profender is a topical solution for the treatment and control of hookworm, roundworm, and tapeworm infections in cats and kittens that are at least 8 weeks of age and weight at least 2.2 lbs. We've all met the kitten and/or cat that is pretty much impossible

to "pill". And, if they're outside cats, it's particularly important that they be kept parasite free, as it is for those cats that enjoy going in and out...and don't forget the kittens/cats that you are kindly feeding, but you doubt you could give them a pill. If any

of these scenarios sound familiar, this product is for you! It's applied in a similar way to that of Frontline...a simple application to the back of the neck at the base of the head on the skin.

Kennel News - We've got the right plan for you!

We've made some changes which we believe will enhance not only our Boarding Kennel, but, our overall ability to provide you and your pets with the best possible experience. We streamlined our prices and are now offering optional exercise plans...like bubble time, play ball, fetch races, and extra walk time. Bubble time will get your dog his or her own personalized, flavored bubbles!...and Fetch races includes a Made in the USA, recycled plastic Frisbee! Each exercise plan consists of at least 15 minutes of one on one time with a Kennel Associate for only \$6.00 per dog. Additionally, we are offering options, such as: ear cleaning, teeth brushing, training sessions, and a limited amount of medical procedures consisting of lab work, microchipping, etc.

The training sessions are offered by Kelly Adam, who recently completed advanced training with Consummate K9 Training, owned and operated by Dave Bal-mat. Anything from basic obedience training to advanced training to working with behavioral issues are now available and these training sessions can be scheduled in your home or at the clinic.

We also have a Pet Cam....several of our runs are able to be viewed online. So, if you're away and want to see your dog, ask about our Pet Cam runs.

We can help!
