Your Community Veterinary Clinic

Laser Therapy

We are really excited to introduce you to the most recent addition to our veterinary services. After extensive research, we have purchased a "Companion Therapy Laser", which we believe will add an alternative mode of treatment for various conditions. The science behind laser therapy is this: deep-penetrating light which allows relief of pain through the release of endorphins and stimulates the injured cells to heal at a faster rate. Laser therapy can offer an alternative treatment option from that of pharmaceuticals, with no dangerous side effects.

Simply put, the application of laser therapy will provide RELIEF.

- Laser therapy allows your pet to heal faster after surgery or any traumatic injury.
- It eases pain and improves mobility without the use of pharmaceuticals and surgery.
- The therapy provides your geriatric animal relief of aches and pains, and allows for more freedom and improved quality of life.
- Everyday disorders such as lick granulomas and chronic ear infections, that cause severe pain and discomfort, are relieved.

We're confident that this additional component of our veterinary services will help a great many pets. And, as always, that is our goal....to allow you and your animal companion to have more quality time together.

So give us a call to learn more about this exciting new option in veterinary medicine!

JOIN OUR ONLINE COMMUNITY AND RECEIVE NEWSLETTERS AND VALUABLE INFORMATION ABOUT OUR sPETcials OF THE MONTH! Email us at smvc@enter.net to be included in our email list or give your email to a staff member.

We are collecting food and supplies for needy dogs and cats in our immediate area. Please help keep pets with their families. For more information on Friend Inc. visit www.friendinc.org

Cutest

Best Buddies

Photos will be displayed and prizes given to the winner of each category during National Pet Week!

Pet Wellness Reports Now Available!!

We're really excited about a new laboratory diagnostic tool that has been made available to us. It's a Pet Wellness Report program which assists you and us in providing pets with a healthy, balanced lifestyle. Certain lifestyle factors can have a huge influence on the health of our pets. Just as a poor diet and lack of exercise increases a person's risk of contracting certain diseases, so do these factors affect our pets' health. Since our pets can't talk, caregivers should be aware of and report comprehensive lifestyle information. This helps us evaluate health risks and develop a blueprint for wellness. A simple blood test is done and sent to the laboratory. You then log on to designated website, answer a series of questions about your pet and after your answers are evaluated, you will receive an in-depth Pet Wellness Report, which rates your pet's risks for many of the common diseases we see. To see a sample of what you'll learn in this report, visit http://www.pethealthsystems.com/pwr_report.asp. Having this new tool is going to allow us to REDUCE the cost of our Canine and Feline Senior Wellness Programs. Give us a call for more information!

Get To Know Us And What We Do.....

Over the past almost 21 years, our veterinary clinic has changed. We've added many new services as our knowledge and learning has grown and a lot of new technology as the industry has grown. Our goal is to always provide the most current, safe, and cost-effective treatments that are available. We also want to be "your community veterinary clinic"....so, we are expanding our community services to include compassionate home euthanasia, drop/off an pick/up services (based on client specific needs) and our Talks and Tea programs. We enjoy educating you about the medical issues that effect your

pets and we come away from any interaction we have with you, learning something ourselves.

As you may know, we've changed our Kennel Services in order to provide a more personalized experience for your pet while in our care and we do have three runs with "pet cam" access. You can log on to a website and view your dog while you're away! If you enjoy giving your dog a bath but find it difficult to do in your home in the winter months, you can make arrangements to give your dog a bath at our facility. Or, we can do it for you!

Kennel Services

We have features to insure the comfort and safety of your pet.

- *Air conditioned, spacious kennels*
- *Indoor/Outdoor runs*
- *Meticulous parasite and disease control*
- *Personalized Plans*
