

## CANCER AWARENESS MONTH

**Cancer in pets is more common then you think! It is the number one natural cause of death in geriatric cats and dogs and accounts for nearly 50% of pet deaths per year. Although the leading cause of death in older cats and dogs, cancer is the most treatable disease when compared to life-limiting diseases such as congestive heart failure, renal failure and diabetes. To help raise awareness, and in some cases prevent cancer in your pet, we are offering a discounted Cancer Screening throughout the month of August. Here is a list of services we are offering...**

Abdominal Ultrasound...checks for abnormalities in the abdomen
